Mohana Aswath M

AI Full Stack Developer

9042202975 ◇ mohanaaswath6@gmail.com ◇ Hosur, Tamil nadu, India ◇ GitHub ◇ Portfolio ◇ LinkedIn

SUMMARY

AI Full Stack Developer with hands-on experience building responsive, user-focused web applications using HTML, CSS, JavaScript, React.js, Type script and Node.js. Designed and developed a personal portfolio website from scratch, applying modern UI principles and clean, maintainable coding practices.
Skilled in Python and MySQL with a solid understanding of full-stack architecture and web development best practices. Possess foundational knowledge in AI tools, prompt engineering, basic machine learning, and Large Language Model (LLM) development. Focused on building intelligent, scalable applications and continuously strengthening expertise in AI-driven systems

WORK EXPERIENCE

Full Stack Developement Internship May '25 — Jun '25
EDU Tantr

- Collaborated with the development team to design and implement responsive web interfaces using HTML, CSS, and JavaScript
- Developed RESTful APIs with Express.js and managed data storage using MySQL and MongoDB databases.
- Participated in code reviews and debugging sessions, contributing to a 65% reduction in application bugs during the internship.
- Assisted in optimizing application load times and improving user experience across multiple projects.

Data Science Internship Dec '25 — Jan '26
Adroit Technologies

- Worked on data preprocessing, cleaning, and transformation using **NumPy** and **Pandas**.
- Performed Exploratory Data Analysis (EDA) to identify patterns, trends, and anomalies in datasets.
- Built data visualizations using **Matplotlib (Pyplot)** including bar charts, pie charts, scatter plots, and histograms to support data-driven insights.
- Applied basic Machine Learning algorithms for prediction and classification tasks.
- Strengthened understanding of the complete data science workflow — data collection, preprocessing, visualization, modeling, and evaluation.

Artificial Intelligence Internship Sep '26 — Sep '26
Code Alpha

- Performed data analysis using Python and libraries such as Pandas and NumPy to process, analyze, and interpret datasets.
- Applied prompt engineering techniques to design effective prompts and improve interactions with AI tools and Large Language Models (LLMs).
- Explored fundamental Machine Learning concepts and AI-powered tools, including developing a voice assistant to understand practical AI applications.
- Gained foundational knowledge of Artificial Intelligence (AI), including AI concepts, applications, and emerging technologies.

SKILLS

AI Full Stack Development HTML, CSS, JavaScript, React.js, Responsive Design, Type script, REST APIs, Node.JS
Databases MySQL, Database Design, Data Modeling, Firebase
Programming Language JavaScript, Python, TypeScript
Tools & Other Skills Generative AI, VS code, Github, Github Copilot, Team Management, AI tools, Debugging, Testing, Deployment Basics, Vibe Coding

PROJECTS

My Portfolio, personal Link

- This portfolio showcases some of my key projects, skills, and the technologies I use. I'm always eager to learn, collaborate, and create innovative solutions.

Final Year Project Pennywise AI Link

- Pennywise AI is a web-based financial assistance application that integrates OpenAI APIs to provide intelligent, context-aware insights for user queries. The application is built using **React with TypeScript**, ensuring type safety, maintainability, and scalable front-end architecture.
  The system leverages **Supabase** for authentication, real-time database management, and secure data storage, enabling user-specific data handling and session management.

Full stack Internship Project AI Chess Game Link May '25 — Jun '25

- Developed an AI-powered chess game that enables a human player to compete against a computer opponent using rule-based and search-based decision making. The system implements core chess mechanics including legal move generation, check/checkmate detection, castling, and pawn promotion.

Data Science Intership Project Covid-19 Data Analysis and Visualization Link Dec '25 — Jan '26

- The COVID-19 pandemic has produced large-scale datasets containing information on confirmed cases, recoveries, and fatalities across different regions and time periods.
- Various visualizations such as line charts, bar graphs, and heatmaps are used to present insights effectively.
- The results provide a clear understanding of regional and temporal trends, supporting data-driven analysis and informed decision-making in public health management

ICT Academy Government Project Mobile Application for Real-time Bus Tracking in Tamil Nadu Cities Link

- This project is a web-based mobile application designed to provide real-time bus tracking across Tamil Nadu cities. The system allows users to monitor bus locations live on a map, improving public transport transparency, efficiency, and commuter convenience.

EDUCATION

Bachelor's Degree in Computer Science, THIRUVALLUVAR UNIVERSITY Jul '23 — May '26

- Relevant coursework: Data Structures, Web Development, Database Systems, Software Engineering.
- Completed academic projects involving full stack web applications using JavaScript frameworks and databases.

CERTIFICATIONS

Internship Full stack development Certificate , Edu Tantr May '25

Front-End Development Certificate, Simple learn / SKILLUP

Oracle certified foundation associate , Oracle university Aug '25

Basic of Python, Infosys Mar '25

Explore Machine learning using python, Infosys Mar '25

Object Oriented programming using python, Infosys Mar '25

React JS , BY Scaler Nov '26

Introduction to MongoDB for Students, ICT ACADEMY Aug '24
